GUIDE SPECIFICATION FOR PERMINATOR® 10 MIL
UNDERSLAB VAPOR BARRIER

SECTION 07 26 16 / SECTION 07130

Below Grade Vapor Retarders

Specifier Notes: This guide specification is written according to the Construction Specifications Institute (CSI) format. The section must be carefully reviewed and edited by the architect or engineer to meet the requirements of the project. Coordinate this section with other specification sections and the drawings.

Specifier Notes: W. R. MEADOWS® PERMINATOR underslab vapor barriers are a new generation of resin/chemical technologies. They are vapor barriers created to provide the vaporproofing industry with economical, highly effective methods for preventing the penetration through the slab of damaging alkaline salts, moisture, mold, radon gas, and water vapor.
